

## REMARKS

Three (3) additional figures (FIGS. 4-6) are submitted herewith in response to the requirement stated in the Office Action. New FIGS. 5, 7-8 are perspective views of FIGS. 1-3 and are disclosed on pages 5-7 of the original specification. New FIG. 6 shows the circuit and the direction of travel in the system. It is submitted that new matter is not introduced.

The specification has been amended herein to add the section headings suggested by the Examiner. The Abstract has not been amended based on the Office Action's stating that it is acceptable. A clean version and a marked-up version of the specification are enclosed. Additions are shown with underling. The specification, under "BRIEF DESCRIPTION OF THE DRAWINGS" has been amended to describe FIGS. 5-8.

The claims were rejected under 35 USC §112, second paragraph as being indefinite. Claims 1-12 have been canceled herein and new claims 13-21 are submitted herewith. The new claims have been drafted following the guidelines and the U.S. patent cited by the Examiner. Attention has been paid to use of the transitional phrase "comprising", reciting an apparatus, using consistent terminology, and providing an antecedent basis. It is believed that the new claims have overcome the indefiniteness in the original claims.

It is noted that the prior art made of record was not relied upon, however pertinent.

It appears that all matters have been addressed satisfactorily, and that the case is now in condition for a complete allowance; and the same is respectfully urged.

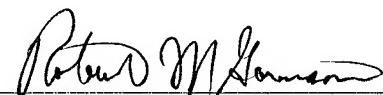

However, if the Examiner has any comments or questions, or has any suggestions as per MPEP 707.07 (d) and (j), for putting the case in condition for final allowance, he is respectfully

Serial No. 10/558,050  
Docket No. 024783.385

urged to contact the undersigned attorney-of-record at the telephone number below, so that an expeditious resolution may be effected and the case passed to issue promptly.

Respectfully submitted,

June 24, 2009
